### ***LETTER OF RECOMMENDATION***

It is a matter of immense pleasure for me to write this recommendation for Mr. Muhammad Irfan Saeed to support his Master's application. I know Irfan for more than 2 years as a teacher and supervisor during his BS (Information Technology) at University of Education, Pakistan. Irfan is a bright student and a creative thinker who also can draw on his own experience and observations to develop thoughtful opinions on a variety of issues. He is a regular contributor to the discussions and the entire class benefitted from his insight and humour.

I met him during his Bachelor studies at University of Okara. He shows great effort and interest in his studies. He passed each course with good CGPA. I was able to observe Irfan in a small group interaction with his peers. He was able to help the group assess a great deal of information and organize it into logical and coherent ideas. The other students looked for him for leadership and he was quick to provide it.

Throughout his studentship, he has exhibited unique and promising attributes as an involved student. Irfan has been in extra and co- curricular activities at the university such as he participated in inter-departmental quiz competition, games competition, and Big Idea Competition (BIC for business incubation) under my mentorship. Irfan was very patient and generous with his time. Without being asked, he stepped in and providing ongoing assistance to other students. He is an excellent writer, takes his writing for research works seriously and works hard to improve it.

He desires to learn new interdisciplinary paradigms intersecting with his area of interest. His receptive and logical disposition gives him special advantages in the pursuit of new ideas and perspectives. Such things made him different from all other fellows. He has a keen desire to learn new methods of machine learning to introduce new methods for the diagnosis and treatment of diseases.

Irfan is a hardworking student, possesses excellent written and verbal communication skills, and has great team management skills. The medium of the institution is English due to which he can speak English fluently. He is extremely organized, can work independently, and is able to multitask effectively in a timely manner.

I believe that his stay at your institution and association with colleagues will certainly substantiate my impression. I wish all the success in his future life and strongly recommend him for your Master program.

Sincerely,

**Dr. Ghulam Ali**

Associate Professor | Head of Department (HoD),

Department of Data Science,

University of Okara,

Okara, Punjab, Pakistan.
